(M 146 463) (M 146 462) To use this probability-based analysis to explore the Weighting Versus Nonweighting The choice of estimator depends on whether we want to make performance of the 2 by 8 joists, it is necessary to define a the assumption that each lot in the population has an equal level of acceptability. Then, the probability of a randomly chance of being selected. In other words, do we want to selected lot of lumber meeting or exceeding this level can be weight the estimates by the size of the yard estimated. This research was to provide a data base for probabilistic floor system design; it therefore precedes the The practical concern here is, do yards with more inventory analysis that will provide a measure of acceptability based sell more...
