In the animal husbandry division the young cattle from the States made good development and remained in thrifty condition. A number of calves were dropped by station cows which had been bred to a registered Milking Shorthorn bull, and milk and butterfat production records were kept. Trap-nest records were continued in a study of egg production in the native hen. In the agronomy division two St. Croix sugar-cane seedlings of the 1922 series stood out prominently in a comparative test with 50 locally grown and introduced varieties as to yield of sucrose. The new seedlings give indication of producing under dry-weather conditions and are regarded as highly promising. In the horticultural division the results with Bermuda onions continued to be so encouraging as to justify growing the crop on a small commercial scale....
