GRIN Verlag Jul 2007, 2007. Taschenbuch. Book Condition: Neu. 208x148x13 mm. This item is printed on demand - Print on Demand Neuware - Master's Thesis from the year 2005 in the subject Computer Science - Commercial Information Technology, grade: A, European University Viadrina Frankfurt (Oder) (Virtual Global University), 73 entries in the bibliography, language: English, comment: To date, experience with nursing information systems has shown limited success in practical deployment. Reasons for this situation are the specific challenges of nursing care in combination with failures to meet requirements in this field with suitable system development. This paper analyzes design approaches followed so far and suggests a process-oriented architecture aimed to overcome deficiencies of today's systems. , abstract: Nursing care for seniors is going through a time of upheaval. On the one hand side, the number of people in need of care will increase significantly due to changes in age structures and demographic development. On the other hand, care services are facing increased demand for quality assurance and a trend towards evidence-based nursing applying scientific findings. There is a focus on the costs of healthcare services today and the projected developments. Official regulations are changed and improved; however, long-term financing is still not solved because of the anticipated developments. Hence, there is a strive towards providing high-quality healthcare services that can be paid for in the future. While this requires process-optimizations on the one hand, additional improvements will be necessary that can be addressed with information technology. To date, experience with nursing information systems has shown limited success in practical deployment. Reasons for this situation are the specific challenges of nursing care in combination with failures to meet requirements in this field with suitable system development. This paper analyzes design approaches followed so far and suggests a process-oriented architecture aimed to...
