

An Elementary Treatise on the Integral Calculus Founded on the Method of Rates or Fluxions

Filesize: 7.71 MB

Reviews

If you need to adding benefit, a must buy book. It can be filled with knowledge and wisdom I am easily will get a pleasure of studying a composed publication.
(Trevor Greenholt DDS)

AN ELEMENTARY TREATISE ON THE INTEGRAL CALCULUS FOUNDED ON THE METHOD OF RATES OR FLUXIONS

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 28 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1881 Excerpt: . . . $2a x$, and $PR = 2y$, therefore $V = \int (2ax - x^2) dx$. Putting $x = a \sin \theta$, Double Integration. 121. When rectangular coordinates are used, the expression for the area generated by a line parallel to the axis of y and terminated by two curves is Let AB , in Fig. 13, be the initial, $o A c$ and CD the final position of the generating line, then the area is $ABDC$, which is enclosed by the curves yy and yy and by the straight lines If in equation (1) we substitute for $y_2 - y_1$ the equivalent expression dy , we have. $U = \int \frac{1}{2} 4 dx$, (2) $J = \int a dy$, which expresses the area in the form of a double integral. In this double integral the limits y_2 and y_1 for y , are functions of x , while a and b , the limits for x , are constants. 122. If the area is that of a closed curve y_2 and y_1 are two values of y corresponding to the same value of x in the equation of the curve, and a and b are the values of x for which y_2 and y_1 become equal, as represented by the dotted lines in Fig. 13. It is evident that the entire area may also be expressed in the form and that when either of the forms (2) or (3) is applied to the area of a closed curve the limits are completely determined by the equation of the curve. 123. The limits in either of the...
